

# Choosing Colours

What colours do you see?

- Cream
- Jasmine
- Sunburst Yellow
- Spring Green
- Apple Green
- Dark Green
- Peacock Green
- Indigo Blue
- Canary Yellow
- White
- Black
- Goldenrod
- Burnt Sienna
- Burnt Orchre
- Dark Brown
- Poppy Red
- Grass Green
- Cool Grey 70%

Start with the lightest colour that you see in a section and layer up to the darkest value.

To make a value darker choose a colour opposite on the colour wheel.

## TIP!

Black is never as black as you may think. By adding Indigo Blue, for example, you can make Black appear even deeper & richer in colour!

## TIP!

To create a dark background, build up layers using Black as well as Tuscan Red & Indigo Blue. If the subject was taken outside, choose Dark Green in place of Tuscan Red.
